PROFESSIONAL SUMMARY

BCIT Computer Systems Technology graduate with Distinction with hands-on experience building full-stack, backend, and mobile applications using JavaScript, React, React Native, Node.js, Python, Django, C#/.NET, Java, SQL, and REST APIs. Brings eight years of professional experience in IT support and business operations, with strong problem-solving, debugging, and communication skills.

TECHNICAL SKILLS

Languages: JavaScript | Python | Java | C# | C | C++ | SQL | Bash
Frontend: React | React Native | HTML5 | CSS3 | Tailwind CSS
Backend: Node.js | Express.js | Django | FastAPI | .NET / Razor Pages | REST APIs
Databases: PostgreSQL | MySQL | SQLite | Firebase / Firestore
Tools & Technologies: Git | GitHub | Docker | Kubernetes | Linux | Playwright | SQLAlchemy | Entity Framework | Ollama | Stripe API | Unit Testing

PROJECTS

Amazon Price Tracker

Technologies: FastAPI, PostgreSQL, Playwright, JWT Authentication, REST APIs

- Designed and developed a full-stack application to monitor Amazon product prices and store historical pricing data.
- Built REST API endpoints for user accounts, JWT authentication, favorites, and product management.
- Automated browser-based scraping with Playwright and designed normalized PostgreSQL tables for users, products, favorites, and price history.

Hauler - Logistics Management Platform

Technologies: React Native, Express.js, Firebase, Socket.IO, Stripe API, REST APIs

- Contributed to a cross-platform logistics management application for iOS and Android using React Native.
- Integrated mobile features with Express.js, Firebase, REST APIs, and Stripe API functionality.
- Implemented real-time job-related chat using Socket.IO, connecting frontend and backend messaging functionality.

Internal Member Portal

Technologies: React, Django, PostgreSQL, Git, Agile

- Developed full-stack functionality for an internal member portal using a React frontend and Django backend.
- Implemented backend business logic and PostgreSQL-backed data features.
- Resolved defects through testing, debugging, Git collaboration, and Agile development practices.

Invoice & Document Management Application

Technologies: C#/.NET, Entity Framework, SQLite, Microsoft Word

- Designed and developed a C#/.NET application for creating and managing business invoices and quotes.
- Used Entity Framework and SQLite for persistent document records and sequential numbering.
- Automated Word document generation with calculation and validation logic.

Local AI Coding Assistant

Technologies: .NET Razor Pages, Ollama, local database storage

- Developed a local, offline coding assistant using .NET Razor Pages and Ollama.
- Integrated a locally running LLM and implemented persistent chat history with multiple conversation sessions.
- Stored conversation data locally to support offline application use.

PROFESSIONAL EXPERIENCE

Office Administrator / IT Support - ASC Collision Repair | July 2016 - Present

- Provide in-house IT support for hardware, software, printers, networking equipment, and business systems, troubleshooting issues to minimize operational downtime.
- Improve internal technology workflows and support day-to-day business systems used by staff.
- Coordinate scheduling, ICBC compliance tasks, customer communication, and competing administrative priorities.
- Communicate technical and operational issues clearly with staff, customers, vendors, and external partners.

EDUCATION

British Columbia Institute of Technology (BCIT) | September 2024 - June 2026
Computer Systems Technology Diploma | [Graduated with Distinction](#)
